

Zoom Session Facilitator Script

Protocol #8042 — Interactive AI Systems for Firearm Safety Education in Youth

Remote Participant Session (~60 minutes)

Principal Investigator: Payton Przyuski | Faculty Sponsor: Dr. Tariq Iqbal

How to Read This Script

“Text in blue quotes = read aloud or closely paraphrase”

► **Orange arrows = action cues (screen-share, send link, etc.)**

🕒 *Gray clock = approximate timing*

- Black bullets = talking point notes (paraphrase naturally)

Yellow boxes = internal reminders (do not read aloud)

PRE-SESSION CHECKLIST

Before session

Complete these items at least 15 minutes before the scheduled Zoom session.

- ☐ Confirm participant has returned signed consent form via DocuSign
- ☐ Open Zoom (UVA institutional account) — enable waiting room & meeting password
- ☐ Verify Zoom recording is OFF (check recording indicator)
- ☐ Have all prerecorded videos ready and queued:
 - Video 1: NAO Robot Instruction Module
 - Video 2: AR Training Module
 -
 - Video 3: AR In-Situ Simulation (3 scenarios)
 -
- ☐ Have all four Qualtrics survey links ready to paste in chat:
 - Survey #1: Pre-Task Demographics
 - Survey #2: Post-NAO Robot
 - Survey #3: Post-AR Training
 - Survey #4: Post-AR Simulation
- ☐ Assign participant their study ID number
- ☐ Test screen-share and audio with a video clip

SECTION 1: Welcome & Consent Review

~5 min

► Admit participant from waiting room

“Hi [Participant Name], thank you so much for taking the time to participate in our study. My name is Payton Przyuski and I’m the Principal Investigator for this project at UVA.”

“Before we begin, I want to let you know a few things about how this Zoom session will work.”

- This Zoom session is not being recorded.
- During the session, I’ll be screen-sharing prerecorded video demonstrations of our system’s modules.
- You will not receive copies of the recordings.
- After each demonstration, I’ll send you a Qualtrics survey link in the Zoom chat for you to complete.
- The whole session should take about 60 minutes.
- You can take breaks at any time, skip any survey questions, or end the session whenever you’d like—no penalty at all.

“I see that you’ve already signed the consent form through DocuSign - thank you for that. Just to quickly recap: this study is evaluating a firearm-safety education system designed for children ages 4 to 7. We’re gathering expert feedback before any testing with children. Your participation is completely voluntary and all your responses will be de-identified.”

“Do you have any questions before we get started?”

Pause and answer any questions. If they haven’t signed consent yet, walk them through the DocuSign process now before proceeding.

SECTION 2: Pre-Task Survey (Demographics)

~5 min

“Great. Let’s start with a brief background survey. I’m going to drop the link in the Zoom chat now. This covers some demographic and professional background questions. Take your time and let me know when you’re done.”

► Paste Survey #1 (Demographics) link in Zoom chat

Participant’s study ID should be pre-filled or communicated to them so they can enter it. Stay available for questions but don’t rush them.

⌚ Wait for participant to finish (~5 min)

“Thank you. Now I’m going to give you a quick overview of what you’ll be evaluating today, and then we’ll jump into the first module.”

SECTION 3: System Overview & Instructions

~5 min

“The system we’re evaluating has three components, and we’ll go through them in order:”

- **Module 1:** First, a NAO robot that delivers a short firearm-safety lesson to children, teaching them four key steps: Stop, Don’t Touch, Run Away, and Tell an Adult.
- **Module 2:** Second, an augmented-reality training environment where children practice those four steps with gesture-based controls and coaching.
- **Module 3:** Third, three realistic AR simulation scenarios where children encounter a firearm in everyday settings and need to apply what they’ve learned.

“For each module, I’ll screen-share a prerecorded video demonstration. After each video, I’ll send you a short Qualtrics survey to complete. We’re looking for your expert evaluation of things like age-appropriateness, clarity, ethical considerations, and feasibility.”

“Any questions about the overall structure before we begin?”

Pause for questions. Then transition to Phase 1.

PHASE 1: TRAINING PHASE EVALUATION

SECTION 4: NAO Robot Instruction Module

~8 min

“Alright, let’s move into the first module. I’m going to share my screen and play the NAO robot instruction video. This shows the robot delivering a firearm-safety lesson designed for young children. As you watch, think about the instructional clarity, tone, age-appropriateness, and how engaging this would be for a child ages 4 to 7.”

► **Start screen-share → Play NAO Robot Module video**

🕒 Video duration: ~5 min

Let the video play fully without interruption. You can monitor the participant’s video feed to check they’re engaged.

► **Stop screen-share when video ends**

“Thank you for watching that. I’m now going to send you a short survey about what you just saw. It covers things like the clarity of the instruction, the robot’s tone and pacing, and whether you think it’s appropriate for young children.”

► **Paste Survey #2 (Post-NAO Robot) link in Zoom chat**

🕒 Survey completion: ~3 min

Wait for participant to finish. Stay available for questions.

“Great, thank you. Let’s move on to the second module.”

SECTION 5: AR Training Module

~7 min

“The next module is the augmented-reality training environment. In this module, children would learn how to use gesture-based controls and practice the four safety steps they just learned from the robot. The video shows a member of our research team demonstrating how a child would interact with the system.”

“As you watch, consider the usability, how clear the instructions are, whether the gesture controls seem manageable for young children, and the overall engagement potential.”

► Start screen-share → Play AR Training Module video

🕒 Video duration: ~5 min

Let the video play fully.

► Stop screen-share when video ends

“Thanks for watching. I’ll now send over the survey for this module.”

► Paste Survey #3 (Post-AR Training) link in Zoom chat

🕒 Survey completion: ~2 min

Wait for participant to finish.

TRANSITION: Training → Testing Phase

~2 min

“Great work - we’re now about halfway through. That wraps up the training phase evaluation. Let’s take a brief moment before we move on.”

“Would you like to take a short break, or are you good to continue?”

Give them a moment. If they want a break, pause for a few minutes.

“The next part is the testing phase. You’ll watch three realistic AR simulation scenarios that show how a child would encounter an unsecured firearm while doing everyday tasks—like looking for paper towels or snacks at a friend’s house. The system assesses whether the child applies the four safety steps and provides feedback. I’ll play all three scenarios, and then you’ll complete one final survey at the end.”

PHASE 2: TESTING PHASE EVALUATION

SECTION 6: AR In-Situ Simulation (3 Scenarios)

~15 min

“Alright, I’m going to share my screen again. This video covers all three simulation scenarios back to back. Each scenario takes about 5 minutes.”

- **Kitchen:** Scenario 1: Kitchen at a friend’s house — child looks for paper towels and finds a gun in the cabinet.
- **Bedroom:** Scenario 2: Parent’s bedroom at a friend’s birthday party — child looks for a wrapped present and finds a gun in the closet.
- **Garage:** Scenario 3: Garage at a friend’s house — child looks for snacks and finds an open gun safe.

“As you watch, pay attention to how realistic the scenarios feel, whether the feedback the system gives is appropriate, the tone escalation when a child makes an incorrect choice, and whether any of this could cause distress in young children.”

► **Start screen-share → Play AR Simulation video (all 3 scenarios)**

🕒 Video duration: ~15 min total

If you have separate video files for each scenario, you can pause between them to briefly check in with the participant. Otherwise let it play through.

Optional between scenarios:

“That was Scenario [1/2]. Ready for the next one?”

► **Stop screen-share after all 3 scenarios end**

SECTION 7: Post-Simulation Survey	~10 min
--	----------------

“Thank you for watching all three scenarios. This last survey is the most detailed one. It covers the scenario realism, age-appropriateness, the corrective feedback strategy, potential for emotional distress, and your thoughts on implementation feasibility. Take your time with this one.”

► **Paste Survey #4 (Post-AR Simulation) link in Zoom chat**

🕒 Survey completion: ~10 min

This is the longest survey. Stay patient and available for questions. Don't rush them.

SECTION 8: Closing & Thank You	~3 min
---	---------------

“That’s everything! Thank you so much for your time and expertise today. Your feedback is incredibly valuable and will directly help us refine the system before we move to any testing with children.”

“Just as a reminder, all of your responses are de-identified and linked only by a study ID number. The link file connecting your name to your ID will be destroyed once data collection is complete.”

“Do you have any final questions or comments about the study, the system, or anything we covered today?”

Answer any final questions.

“If anything comes to mind later, feel free to reach out to me at hzy8kg@virginia.edu, or to our Faculty Sponsor, Dr. Tariq Iqbal, at ti3fe@virginia.edu. Thank you again, and have a great rest of your day!”

► **End the Zoom session**

POST-SESSION CHECKLIST

After session

- ☐ Confirm all 4 Qualtrics survey responses were submitted for this participant
- ☐ Verify Zoom session was NOT recorded (check local & cloud recordings)
- ☐ Log participant completion in your tracking spreadsheet
- ☐ Update study ID link file with session date
- ☐ Clear Zoom chat history
- ☐ Note any issues, technical difficulties, or participant comments for your records
